

AUDITS AND SURVEYS

TCS can offer businesses a complete **site survey** and **audit** to investigate their existing **data cabling** and **network infrastructure** system performance.

These surveys include:

- Analysing your data transmission rate for your category of cable
- Extensive testing of wiring and connections to identify potential performance faults
- The viability of onsite equipment to determine if it is best suited to our businesses' objectives
- Identify bottlenecks and areas of strengths and weaknesses in your current network.

TCS provides surveys for **CAT cabling installations** to all specifications and a complete range of **fibre optic cabling;** testing the complex features of internal and external features and environments.

At the end of the site survey a full report of our findings will be submitted as a part of a **direct consultation**. This is then followed by a technical advice and recommendations to resolve any performance issues that we uncovered.

For more information or to arrange an audit or survey for your business, our team of networking professionals are always on hand to offer support and advice
