

EV CHARGING INSTALLATION

As the world becomes more conscious of the impact of **global warming** and the carbon footprint created by vehicles, **electric cars** and **hybrids** are becoming more popular and affordable. Therefore, **EV charging points** are in a higher demand than ever. By having a charging point installed at your **home or business** it takes out the stress of finding a charging point, makes electric cars more appealing to your staff and clients, and gives your business a greener atmosphere.

Our efficient and fully-trained engineers can install **OLEV** (Office of Low Emission Vehicles Office) approved appliances at any home or car park site.

What do TCS offer?

We undertake every part of an EV charging project from initial consultancy through to the ongoing maintenance.
